WEATHER KEY POINTS

07/31/21 - 08/06/21

Saturday-Friday

- Scattered showers and thunderstorms can be expected at times along and east of the Sierra through Sunday, before a drier weather pattern returns for much of the coming week. A few storms are also possible across the southern mountains and deserts today and tonight.
 - Localized heavy rainfall is possible with storms through tonight, leading to a threat for flash flooding, especially near recent burn scars
 - Flash Flood Watches remain in effect through tonight for much of the central and southern Sierra and locations to the east
- One more day of hotter temperatures is expected across the far northern California valleys today, with Heat Advisories in effect for the lower elevations of Siskiyou County. More seasonable early August temperatures will be noted for many areas Sunday through next week, with the exception of the southern deserts where hotter weather will return through mid and late week.
- Outside of any showers and storms, fire weather conditions will remain locally elevated through the next 7 days for the foothills and mountains where localized gusty winds of 25 to 35 mph can be expected. Lightning through Sunday may also pose a risk for a few new fires across northern California.
